4th International Conference on Network Softwarization
25-29 June 2018 – Montreal, Canada

About NetSoft 2018

The International Conference on Network Softwarization (NetSoft) has been created as Software-Defined Networking (SDN), Network Function Virtualization (NFV), and Software-Defined Clouds have been seen as key ingredients of the overall transformation trend, which is deeply impacting and Telecom and IT industries. It is a series of annual events that was established as part of the IEEE Software-Defined Networks initiative of the IEEE Future Directions Committee to build an IEEE-wide community in this area across multiple IEEE societies and councils. Today, NetSoft is seen as the IEEE flagship conference in the domain and is an important venue for presenting and discussing the latest innovations, results and developments in softwarization that is attended by foremost experts in this area from industry, academia, governments, enterprises and other market segments.

The main technical program is usually complemented by workshops, keynote speeches, a distinguished expert panel session and demo sessions. For more information about previous NetSoft editions, please visit ieeenetsoft.org.

The theme of the NetSoft 2018 –*Achieving smart network softwarization* – has been selected to reflect the ever-growing need for agility, automation and autonomy, witnessed by various operating-platform initiatives, that is essential to the proactive management of the softwarized infrastructures.

NetSoft 2018 is organized by the [IEEE Communications Society](http://www.ieee.org).

Past Patrons

About IEEE Communications Society

IEEE Communications Society is a leading technical and professional community with over 50,000 members worldwide. Founded in 1952, the Society evolved into a diverse group of global industry professionals with a common interest in advancing all Communications technologies.
